

MAINTENANCE PRACTICES AVAILABLE AS HANDBOOKS

INDEX AND ORDERING INFORMATION

1. GENERAL

1.01 There are a limited number of maintenance practices that are available both as standard-sized Bell System Practices (BSP) and as maintenance handbooks. Each of these handbooks contains only the duplicated contents of its companion BSP. Each is identified by a 6-digit select code and is usually pocket-sized (3-1/2 by 7 inches). This section provides an index of these handbooks. The 6-digit select code and title of each handbook, the 9-digit number of the companion BSP, and the issue number of the BSP are included in the index.

1.02 The reasons for reissuing this section are listed below. Revision arrows are used to emphasize the more significant changes.

- To delete references to handbooks identified by select codes 405-034, 405-035, 405-075, and 405-076
- To add references to handbooks identified by select codes 405-073 and 405-074
- To indicate the name change of the Indiana Publication Center to Information Distribution Center
- To change ordering procedure.

1.03 Recommendations for changes to this section should be submitted as specified in Section 000-010-015, How to Comment on Bell System Practices.

2. ORDERING

2.01 These handbooks are available from the ♦Western Electric Information Distribution

Center (IDC), formerly named the Indiana Publication Center.♦ They are stocked separately from the standard-sized, companion BSPs and must be ordered separately.

2.02 These handbooks are ordered on a 1-time basis. The 6-digit select code and the title of each handbook are entered on the order. If the 9-digit BSP number appears on the order, the companion BSP will be supplied rather than the handbook. Multiple select codes may be entered on the same order.

2.03 ♦Orders for handbooks or for BSPs must be placed through Bell Operating Company BSP Documentation Coordinators.♦

2.04 If a given standard-sized, companion BSP is revised and reissued and if it is determined that the revised BSP content shall be released as a handbook, then the revised version will be assigned a new 6-digit select code and a new order must be processed for the new handbook.

3. INDEX

3.01 Only those maintenance handbooks that have a standard-sized, companion BSP are listed in this index.

3.02 A bullet (●) indicates an item that has been added or changed since the previous issue of this index.

3.03 A square (□) indicates a canceled item. Information relating to the cancellation, if necessary, will be shown in a note following the item. Canceled items and related notes will be deleted upon reissue of the index.
