LOCATORS

DESCRIPTION

TOOLS

1. GENERAL

1.01 This section describes coded Bell System locator tools.

1.02 This section is reissued for the reasons listed below. Since this is a general revision, revision arrows have been omitted. The Equipment Test List is not affected

(a) To rate the 354 tool as Mfr Disc.

(b) To update to standard format.

2. DESCRIPTION OF TOOLS

2.01 *354:* The 354 cam locating tool is Mfr Disc. with no replacement.

2.02 *743A:* The 743A locating tool (Fig. 1) is used for locating a drilled hole necessary to modify coin collectors on coin telephones to accept a coin level detector.

2.03 *753A:* The 753A locating and identifying tool (Fig. 2) is used to locate and identify terminals for purposes of wiring and testing during manufacturing, installation, and maintenance. This tool is used on No. 1 ESS, J1H012A and J1H013A Switch Units.
