AN = Allowable Number of defects in Sample

Note 1: Verification of these types of relays is not required except when testing results or other evidence indicates an unsatisfactory condition of adjustment.

Note 2: For each type of defect recorded sufficient additional inspection shall be made to insure the elimination of the irregularity in the equipment involved.

Note 3: Where pulse repeating requirements are applied a complete check shall be made in all cases either as a part of the verification or of the Performance Testing procedures.
