

1A KEY TELEPHONE SYSTEM

CONNECTIONS

INTRODUCTION

1.00 GENERAL

1.01 The following C Sections show the connections for KTU of the 1A key telephone system. Because of the large number of possible arrangements, no attempt is made to show each arrangement individually. From the features required on an installation, the installer can select the KTU or combination of KTU needed.

1.02 A schematic and connection figure is given for each KTU.

1.03 Key telephone set connections for 400- and 500-type sets and external keys are given in the C Section covering 1A1 key telephone system connections.
